## AI Executive Summary

### AI Powered Findings

- Forecast projects spend holding near ~\$52M/month into 2025, in line with the two-year trend.
- Anomaly detection flagged an unusual spend dip in mid-2023 (~\$47.8M).
- K-means clustering surfaced three supplier segments — high-spend/low-risk strategic partners, a high-risk watch list, and low-spend tail suppliers.
- Key Influencers found IT-category suppliers ~7.5× more likely to be critical-risk.
